### Professional Experience

#### Two Maids

12/2020 – present

##### Frontend Developer

Birmingham,  
United States

- Developed and managed a customized Next.js website for 100+ locations, optimizing user experience and SEO, resulting in a 50% increase in lead generation.
- Implemented a widely successful tipping feature, generating over \$3.5 million in additional revenue annually.
- Developed a cutting-edge React project: an interactive, real-time map showcasing website user activities, live locations, and crucial company performance metrics, fostering seamless team collaboration, empowering data monitoring, and enabling informed decision-making.
- Facilitated communication between franchise owners, swiftly identifying and resolving technical issues, resulting in a 95% satisfaction rate.
- Maintained and refined custom internal scheduling software with Python and Django, implementing APIs, enhancing UI, and reducing bug reports by 40%.

#### Idenfit

07/2020 – 09/2020

##### Frontend Developer Intern

- Collaborated with team members to develop and implement effective solutions to customer-submitted bug tickets, showcasing problem-solving abilities and attention to detail.
- Participated in cross-functional teams to discuss business requirements, design sessions, and review functional specifications.

## Projects

---

### Smart Day [↗](#)

*(Personal Project)*

Created a goal-tracking web app using Next.js, Supabase, Prisma, Clerk.js, Tailwind, Redux Toolkit, Vercel AI, and Nivo Charts. Users can track daily activities to measure progress towards their goals. The app offers comprehensive overviews, AI coach suggestions, and visualizations for effective goal monitoring.
